JUPITAIR

MONACO

COMPANY

# SOCOTA TB 20 1999

This aircraft offers impressive speed and range for its class, making it the ideal choice for long-distance travel—whether for a leisure getaway or an important business trip.

The cabin, accessible via the model's signature gull-wing doors, provides a spacious and refined interior with four sand-colored leather seats. The seats show light wear consistent with the aircraft's age, as visible in the photos.

The cockpit is equipped with a Garmin GNS530 and a KFC150 autopilot, a highly desirable and reliable configuration. The exterior features a modern paint scheme, adding to the aircraft's overall appeal.

The propeller was overhauled during the last annual inspection in September 2024, ensuring that this aircraft is fully ready to fly.
